2 Wood Screws
4 x 25

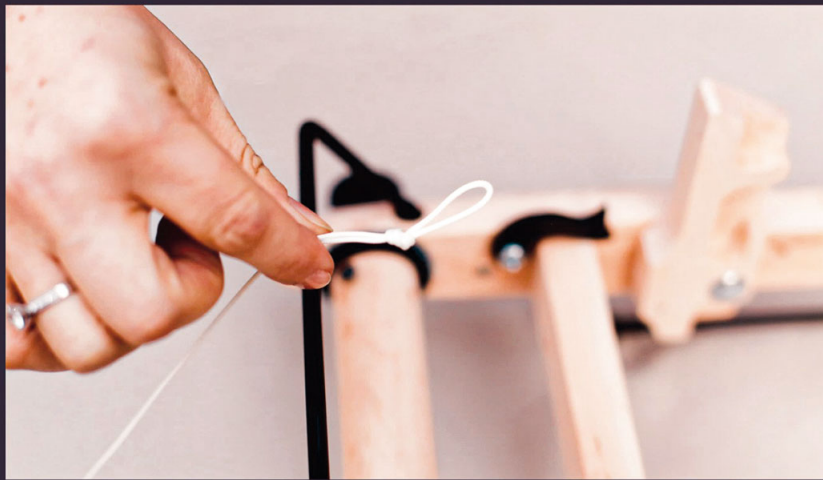

Slightly pull the ends of the metal leg brackets outwards to insert into holes.

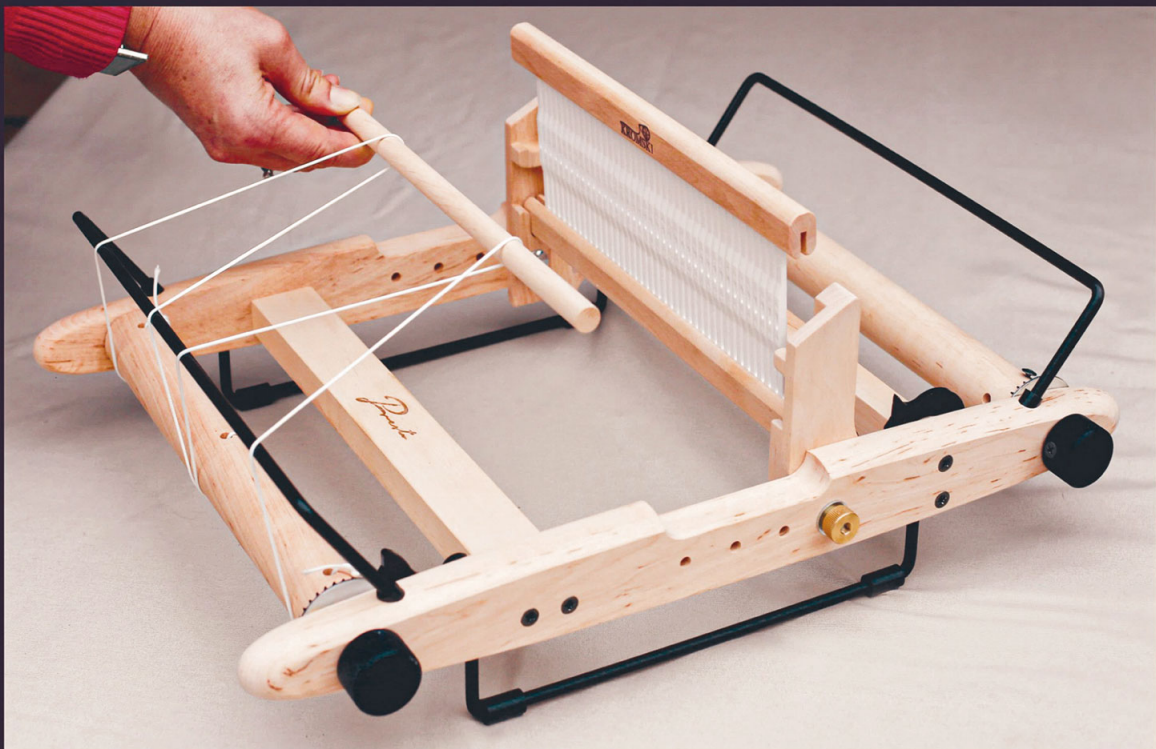

Insert fully so the leg brackets will hold securely.

Metal beams will stay in place when inserted completely.

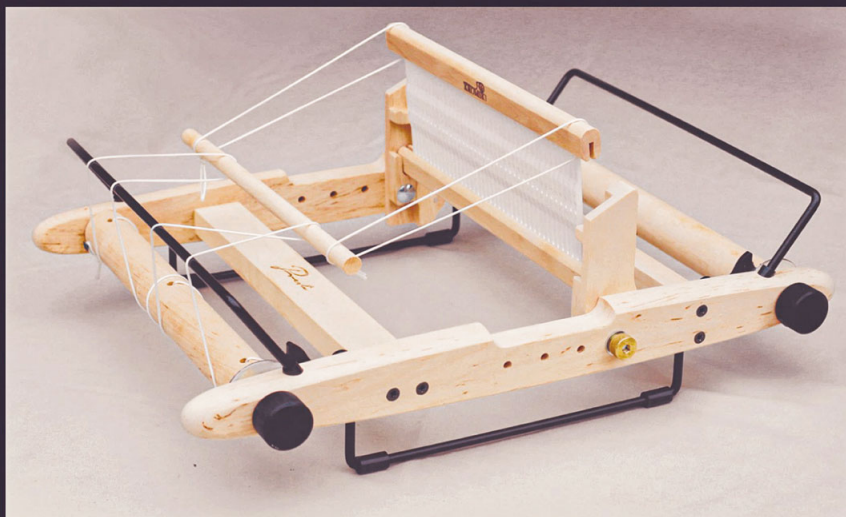

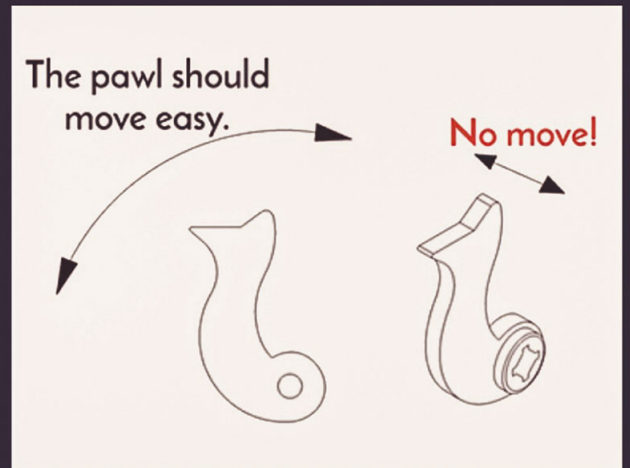

Tie a loop in each end of both long strings.

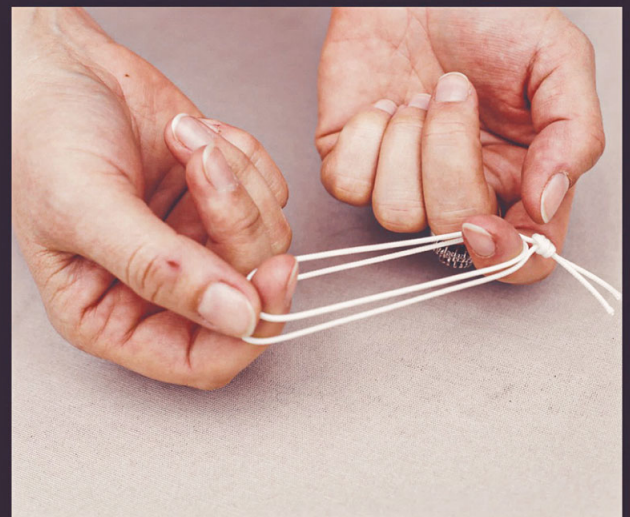

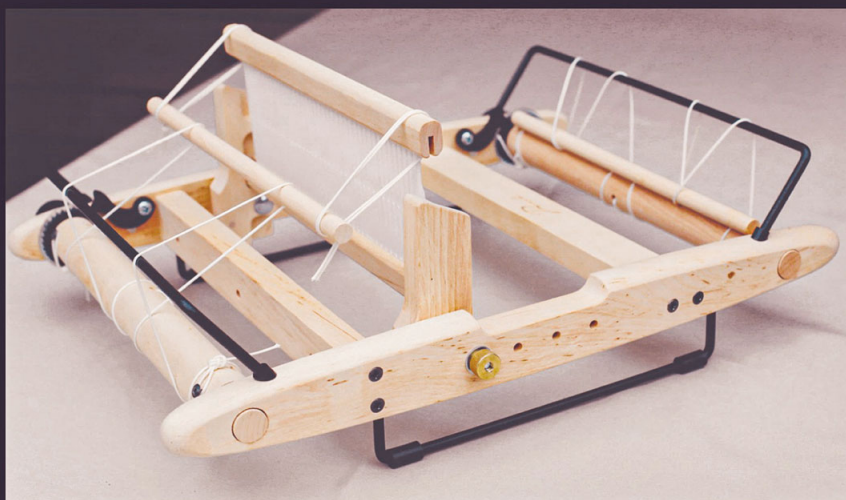

Screw this bolt strong, next unscrew a little.
The pawl should turn.

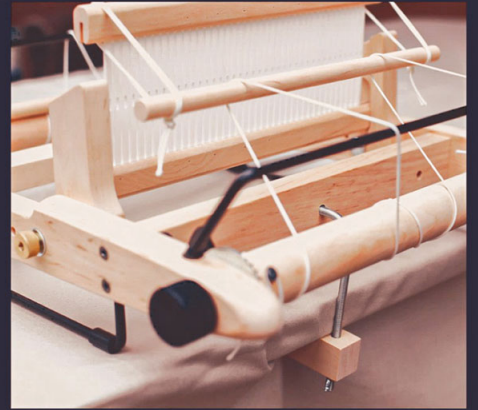

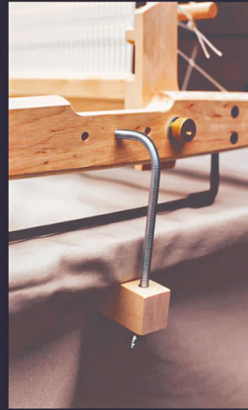

Tie each short string in a loop.

Use short string as loop.

Brace the loom so that all points are level on a table
top and tighten the screws on the cross support.

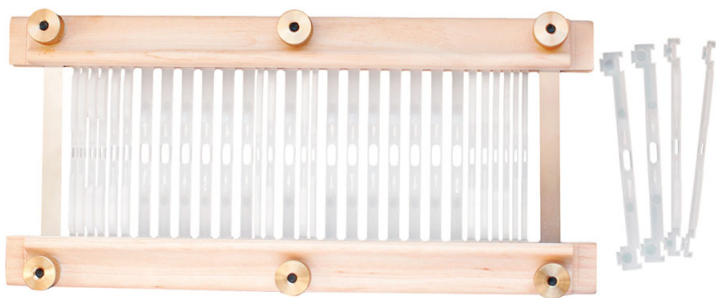

A completely assembled Presto with included accessories:
